Application Restart Control
Patrol DB Logmaster for MVS for DB2
Recovery Management
Application Performance issues
Apptune
BMC Utilities with Snapshot technology
RDBMS Change Management
Change Manager and Patrol DB Change Manager
DASD Manager

The name of the teacher is **Horst Bratfisch** and his main DB2 knowledge comes from his 8 years at Creditanstalt (large Financial Institute in Austria know they have been merged together with Bank Austria). He started there as a Mainframe Application programmer (PL1, IMS, DB2, VSAM, CICS and Batch), came to a CASE and New Technologies group where he was responsible for evaluating a Code generating CASE tool from the technical standpoint and ended up as a internal consultant with main focus on Performance issues especially in the DB2 area. After leaving Creditanstalt and before joining BMC he worked a few months as a Consultant. At BMC he started 1996 as DB2 Software Consultant, enlarged his knowledge to a lot of Open Systems platforms and RDBMS's and has know the responsibility for the Technical Group at BMC Austria.
